8MS® Cloud Carrier Express

Carrier Express® can be used as a standalone application for automatically provisioning toll-free multi-carrier end routing, or as part of 8MS Cloud, to provide simultaneous one-step provisioning through Somos SMS/800. Either way, Carrier Express saves you money by increasing automation and making toll-free provisioning easy.

8MS Cloud offers several cloud services for provisioning.

Provisioning toll-free numbers is typically a two-step process. Toll-free provisioning personnel first reserve and activate toll-free numbers in SMS/800. Afterward, they work with their carriers to get those numbers correctly routed and terminated in the network.

Carrier Express, as a standalone cloud service, automates the network provisioning process across multiple major carriers including AT&T, Verizon, Level 3, and Impact Telecom. If used in conjunction with 8MS Cloud Core, it also automates toll-free number provisioning in the SMS/800 registry in the same process.

By using 8MS Cloud provisioning, your staff can turn up their toll-free services faster, without errors, and with better and more efficient routing plans. The result is a significant reduction in costs, time to revenue, and higher customer satisfaction.

- 8MS Cloud Carrier Express allows you to add, change, and delete toll-free numbers with multiple carriers simultaneously. For each number managed, a user can specify the associated carrier routing plan. Carrier routing is easily activated or deactivated.

- Carrier Express supports batch record management based on 8MS Cloud's number list capability, and users can view their entire toll-free inventory to see the toll-free number routing records associated with each carrier.

- Users can make updates to routing records before or after completing the toll-free activation in the SMS/800 repository, as there are no dependencies between these two steps.

> "Activating our toll-free numbers at the carrier level with Carrier Express has shortened and simplified our new customer turn-up process."
>
> Kerrie A. Miller | Provisioning Specialist II
> Wholesale Carrier Services, Inc.

Using Carrier Express with 8MS Cloud provides significant advantages for both RespOrgs and the carriers they use. For RespOrgs, faster, more accurate provisioning and more efficient route optimization results in cost savings and makes them more competitive because they can accomplish the entire provisioning process in a single step. Furthermore, their provisioning is much more accurate, thereby eliminating rework and thus shortening the time to revenue.

8MS Cloud Platform Services

8MS Cloud Core - The main application service of the platform that simplifies and automates the provisioning of toll-free numbers.

8MS Cloud Carrier Express - A standalone or add-on service of the platform that automates the carrier-side provisioning and activation process.

8MS Cloud API - An add-on service that allows carriers and RespOrgs to streamline the toll-free number provisioning flow and integrate the power of 8MS Cloud into their in-house IT infrastructures.

8MS Cloud CPRGen - An add-on service that automates the generation, management, and optimization of complex geographic toll-free routing.

8MS Cloud LCRGen - An add-on service that creates least-cost routing by minimizing external carrier costs and generating optimized toll-free routing.

8MS TeXT - A turnkey solution to enable carriers and RespOrgs to text-enable and deliver texting on toll-free numbers for your customers.

800ForAll.com - An e-commerce website, based on 8MS Cloud, that allows individuals to search for and reserve toll-free numbers and port those numbers to a carrier or RespOrg of their choice.

About 8MS Cloud

CSF's leading SaaS platform simplifies and automates toll-free number provisioning and complex routing with increased automation and a simple administrative interface.

With 8MS Cloud, you can reserve, update, and activate toll-free numbers in bulk in the Somos SMS/800 database and major carrier networks. Use 8MS Cloud to optimize the routing of toll-free numbers based on geography and least cost, and quickly re-route them during an emergency. The platform also provides a turnkey solution for text enabling toll-free numbers from the same interface, without the need to establish separate relationships with texting providers.
